**Celerant Technology Included on Inc. 5000 List for the Fourth Year in a Row
*Inc. Ranks Celerant on 2011 List of the 5,000 Fastest-Growing Private Companies in America***

Staten Island, NY (September 21, 2011) – *Inc.* recently announced that Celerant Technology Corporation (www.celerant.com) has once again achieved placement on the Inc. 500|5000 for the fourth consecutive year. This exclusive ranking of the nation's fastest-growing private companies represents the most comprehensive look at the most important segment of the economy—America's independent entrepreneurs.

"Now, more than ever, we depend on Inc. 500|5000 companies to spur innovation, provide jobs, and drive the economy forward. Growth companies, not large corporations, are where the action is," says *Inc.* magazine Editor Jane Berentson.

Celerant Technology is a leader in the retail software industry, providing advanced multi-channel software in a single, integrated system. Celerant Command Retail continues to receive recognition as a real-time solution for retailers looking to manage every aspect of their businesses in one complete system.

"We are again honored to have been ranked by Inc. 5000 as one of the top companies in the nation, for the fourth year in a row," said Ian Goldman, President and CEO of Celerant Technology. "We are dedicated to developing retail software that enables our clients to seamlessly run their operations using one system, one platform and one architecture. Our technical advancements and understanding of the retail industry help to facilitate our growth as a company, as we continue toward future success."

The 2011 Inc. 5000 is ranked according to percentage revenue growth when comparing 2007 to 2010. To qualify, companies must have been founded and generating revenue by March 31, 2007. Additionally, they had to be based in the United States, privately held, for profit, and independent—not subsidiaries or divisions of other companies—as of December 31, 2010. (Since then, a number of companies on the list have gone public or been acquired.) The minimum revenue required for 2007 is \$100,000; the minimum for 2010 is \$2 million.

Celerant Technology's ranking on the Inc. 5000 for the fourth consecutive year demonstrates the financial strength and stability of the company and recognizes Celerant's continuous growth as a leader in the retail software industry.

Complete results of the Inc. 5000, including company profiles and an interactive database that can be sorted by industry, region, and other criteria, can be found at www.inc.com/5000.

About Celerant Technology

Celerant's Command Retail is an advanced real-time retail management system, which manages all areas of retail including POS, Inventory Management, Warehouse, Distribution Center, Allocation, Multi-Channel/E-Commerce/Kiosk, Data Mining, and Back-office, in a single, integrated system. Our advantage is the flexibility of our Java platform, allowing Celerant professionals to conduct cost-effective analysis and adaptation based on the individual needs of each retailer. The result is a better system that meets the needs of retail businesses and gives them the tools to take Command of their success.
